

Sector 56 current Planet-like transit candidates

30 human-accepted morphology candidates: 12 original human-adjudicated, 18 model-enriched; 13 current two-aperture period matches.
Groups: benchmark=1, A=12, B=15, C=2.
Priority is transparent triage, not astrophysical validation: A has aligned current ADP periods; B is small-aperture-led; C adds a Tier-1 review warning.
Morphology fold factors are evidence-view choices, not claimed orbital periods.

Rank	Group	TIC	Route	Tmag	BLS P [d]	View P [d]	Dur. [min]	Small depth [%]	Small SDE	ADP P match	Target QA
